By the bye, Madame Albani will not appear at the opera here next season, although she will sing at the Handel Festival at the Crystal Palace in June. News has arrived of the safe arrival of the Canadian prima donna and her party at Halifax, where their first soncert was enormously successful.

mously passed.

The committee of the Thames Angling Preservation Society met on Tuesday last, and there was a full attendance of members, Add. A. Nuthall (president) in the chair. The financial statement showed the society to be much in need of funds to enable it to continue its good work in re-stocking and preserving the river for the benefit of all anglers. Mr. E. Murphy took his seat as representative of the Anglers' Association, and was warmly well-comed. A discussion as to sundry debatable points in the Thames by an example of the committee of the committee of the committee of the committee of the committee, and the usual compliments closed a prolonged sitting.

Ionged sitting.

The monthly smoking concert of the Hoxton Brothers, to be held at the Spread Eagle, Kingsland-rd., Shore-ditch, on Monday evening, promises to be a big success. Mr. W. J. Wade (secretary, Central Association) presides, Mr. H. Patman occupies the vice-chair, and quite a host of tabat is promised. Ladies are cordially invited.

It is a very common and very doleful experience of ladies to engage domestics who are quickly discovered to know little or nothing about housework. They are, as a rule, most willing to learn, and generally behave in quite an exemplary manner during tuition. But in the meanwhile, the mistrees has a rough time of it, what between breakage and bungling, while no expense is the control of the cont

who appear to be deroid of consciences.

Dining at one of these places—hardly quite first class—the other night, found myself charged dd. each for the cigarattes smoked by myself and my guest. They were nothing out of the common, either; precisely the same kind can be purchased at baccy shope for one-fourth of the price. The next time I visit that establishment, I will be glad to see an accomplished fact, is that the jug handle arrangement of the back of the hair is fast failing out of atvour. The latest idea is to have the hair drawn up to the common.

### MADAME.

A very stylish gown for an afternoon reception is of shot repp, the colour combination being a bright tint of mauve shot with black. The plainly-made skirt is cut rather longer than ordinary walking length, but at no point is it allowed to rest upon the ground. It fits easily, but without any strain to the figure.

The ownership of a costly motor-car seems likely to become the hall-mark of the British millionaire before the end of the contury. I am informed that many of these plutocrate have already ordered the new conveyance, and it is farther planned to have a motor-car meet in Hyde Park two or three times every year, after the practice of the Four-in-Hand and Coaching Clubs.

It is good news that the South Eastern Railway proposes to carry out certain costly improvements with the abject of quickening the exits and entrances of its trains within the metropolitan area. Every one who travels by the line is painfully aware that the chief delays take place between New Cross and the several term for the swinger of a butterfly. That heroic millionaire, Mr. Barnato, has been, it appears, lookins about for more worlds to conquer. His eagle eye has chiefy fallen, for the time being, on Canada and British Columbia, but I fully expect to hear, before long, that he purposes to undertake the auriferous development of Siberia. I know of a more promising country than that, in Northern Slam there is plenty of gold, but it has never been attempted to be worked in a scientific manner. True, it is not a very any country to get at, but difficulties do not count when a man of Mr. Barnato's to allow it is to the make a sin concerned.

There is a whispered rumour abroad that the full sleeve puff is on the decline. "They say" that in Paris it is alidy growing beautifully less, and bids fair soon to disappear altogether." In the meantime, however, we have by no means discarded it. Fulness in some shape or form continues to appear on our sleevelops. Sometimes it sakes the form of a double frill; then we have the wing drapery, caught up the centre with a band of ribbon. The part on our sleevelops. Sometimes it sakes the form of a double frill; then we have the wing drapery, caught up the centre with a band of ribbon. The should up uff is in great favour, as well as the double puff.

Another "they say," that I, for one, shall be glad to see an accomplished fact, is that the jug handle arrangement for the bank of the hair is fast falling out of favour. The latest idea somewhat in Japanese style in soft of puffs and twists. To those who do not possess very luuriant tresses this is to have the hair drawn up to the top of the head, where it is arranged comment for the back of the hair is fast falling out of favour. The latest idea comewhat in Japanese style in soft of puffs and twists. To those who do not possess very luuriant tresses this is the way of puffs and curls with very little mosterial.

It is wonderful how much may be done in the way of puffs and curls with very little material.

And it there is another thing I want these will be the street of a sunday his children will cry for bread on the Monday. Are the Quist Bunday Society prepared for this, or dor't they trouble shout such a trifle?

I have been for the last 10 days working in the country, and spent last Sunday in a Lancashire cotton town, and after breakfast I said to my host I will go and buy a "People." Why," as id he. "You cannot buy it here on a Sunday; all the shops are shut, and if a boy was to cry papers in the street, they would give him 7 days." So for the first time for 8 years I had to go without my Sunday paper. I can tell you it was something awful.

Now, the effect of that amend-nent, if it had been adopted, would, ment, if it had been adopted, would, of course, have been not only to protract the inquiry to an in-ordinate length, but, which is even more undesirable, to obscure completely the real issue before the committee. The device was however, a good deal "too thin," and the Moderates naturally declined to walk into the Progressive trap. The amendment was debated hotly, and thally lost on a division. Then, and then only, seeing that the game was THE GUILDHALL SCHOOL OF MUSIC.

and therefore misleading, investigation.

So far, then, so good. But what is
the real meaning of the task which
the committee has before it? The
"management" of the Works Department is the first point which the resolution mentions when stating the
terms of reference, and "management" is a sufficiently comprehensive
term. If the members of the committee do their duty—and we have no
reason to doubt that they will—that
duty will include a searching investigation into the reason why helf a
domen officials of the Works Department suddenly took it into their heads
to cook the departmental accounts,

subordinate officials of the department of had nothing to fear, whereas, on the other hand, from the Progressives—so long the dominant party on the council, and the avowed backers of a the Works Department—they had much both to fear and to hope. The thought that is in every Londoner's mind, and the word that is on most Londoner's lips, just now is this—That these men set to work to tamper with their accounts because they were given, in one way or another, to understand that such a course would be agreeable to those who were determined that, by hook or by crook, the Works Department should be passed off apon the public as a success. To suppose that half-a-dosen man would simultaneously do wrong when wrong-doing a could bring them no direct personal again is opposed to the teaching of common sense, and the explanation of their conduct must necessarily lie elsewhers. What the committee has to do, then, is to find out, if possible, whether the hands of certain people are clean in this matter or not. This is—or should be—in no sense a party question. It is a question of swing the municipal government of London now sense, and the explanation of the municipal government of London sense, and the works Department right or wreng. What London now wants to know is whether any members of the Council have been the real, though hidden, cause of the missing of the Council have been the real, though hidden, cause of the missing Department?

Accused, who had been admitted to bail in 25,000, appeared in the dock fashionably dressed. He is stated to have a wife and 3 children.—Mr. Martin said his daughter Carrier was 17 years of age on June 19 last, but she looked older. She left home without his knowledge. Kay had stayed at the witness's house, and he had made presents.

to his daughter. His daughter had frequently slept away, but witness always understood that she was with a married lady friend. He had borrowed small sums of money from accused, but oould repay him at any time. He knew Kay was married, but considered he was honourable, although he knew Mrs. Kay had instituted divorce proceedings. Mr. Martin asked for a remand to enable him

THE WIDOW FAILED. In the Lord Mayor's Court, before Sir C. Hall, and s jury, a widow named Hartigan sued the London Road Car Co. for damages, owing to the conductor's punch coming in contact with her forehead as abe got into an omnibus near the Mansion House on Aug. 7. Her forehead bled very much, and a passenger applied a little sticking-plaster, and when she got home she west to a medical man, who attended her for a fortnight. Plaintiff's solicitor advised the doctor to charge 3ga, and he said he should be quite estimated with that. The Recorder remarked that a conductor could exacted be expected to hang his punch round his neck at different heighte, according to the height of the passengers (laughter), and if it had been lower it might have knocked the lady's teeth out or given her a punch in the stomach. This accident was evening to a sudden lurch of the omnibus, and though there was a small scar; it was no great disfigurement. The question was: Could the conductor be said to be negligent, as the omnibus was stowly moving when the lady got in—The Jury found for defendants.
